COLD SPOT?

Say goodbye to

- * Chilly bathrooms
- * Cold bedrooms
- * Cold floors
- * Noisy heaters
- * High heating costs

CONVECTAIR
HEAT THAT MAKES SENSE!

Discover North America's most innovative line of electric heating solutions

WWW.CONVECTAIR.COM

- Units are low profile and aesthetically pleasing
- As much as 30% more energy efficient than baseboard heaters, achieved through:
 - a.) Electronic “proportional” thermostat maintaining a 1/5 degree tolerance...no large temperature fluctuations...silent adjustments every 25 seconds
 - b.) “On-board” thermostat 4 inches off the floor...no severe temperature drops
 - c.) “Lite-mass” rapid heating, aluminum mono-block element
 - d.) Very strong convective air movement gives rapid room temperature balance
- No “snap-crackle-pop”... one piece floating elements are absolutely silent
- Ease of installation...units (except Samba) are installed with a simple surface mounted bracket screwed to drywall anchors...120v units come with 6 foot cord and plug...240v units equipped with armored cable and junction box cover
- Wide range of sizes...it is easier to make the heater fit the house, than make the house fit the heater
- Much safer than common “kick-over” portable heaters...all units are wall mounted and equipped with overheat protection
- Silent operation...absolutely silent elements and electronic switching...fan equipped units are nearly silent
- Excellent warranty...2-years bumper-to-bumper, 5-years on element...simple DIY “snap-off/snap-on” replacement.
- 240v systems are Energy Star rated, the only electric heat company to achieve this rating.
